

# Heating and Cooling

Mississippi Power customers can take advantage of our Large Commercial and Industrial Program. This program is designed to help all commercial customers reduce operating costs, lower environmental impacts and improve their bottom line.

Maximum rebate for the combination of lighting, lighting controls, heating and cooling, kitchen equipment and refrigeration upgrades is \$30,000 per premise, per program year.

| MEASURE DESCRIPTION                       | REBATE/UNIT                                              | REQUIREMENTS                                                                                                                                                                                                                                                                                                                                                                                                                            |
