

**NOTIFICATION OF CLOSURE COMPLETION
PLANT DANIEL ASH POND B
MISSISSIPPI POWER COMPANY
MOSS POINT, MS
40 CFR §257.102(h)**

Mississippi Power Company hereby provides notification that closure by removal of the Plant Daniel Ash Pond B coal combustion residuals (CCR) surface impoundment, located at the Plant Daniel facility in Moss Point, Mississippi, has been completed in accordance with the requirements of the federal Coal Combustion Residuals Rule set forth in 40 CFR Part 257, including 40 CFR §257.102(c), and as described in the written Closure Plan prepared pursuant to 40 CFR §257.102(b).

Closure activities included complete dewatering of the surface impoundment to remove all free water, followed by excavation and removal of all CCR materials within the impoundment footprint. The liner system associated with Ash Pond B was removed following CCR removal, and the impoundment area was subsequently backfilled and graded in accordance with the approved Closure Plan. All CCR excavated from the Plant Daniel Ash Pond B were transported and disposed of at the Plant Daniel North Ash Management Unit, a permitted landfill facility. Based on completion of these activities, the surface impoundment no longer contains CCR or free liquids, and closure by removal has been completed in compliance with the requirements of 40 CFR §257.102.

Certification by a Mississippi-licensed Professional Engineer that closure has been completed in accordance with these requirements is provided below.

Gerrad Wilson, P.E. 02/10/2026
